

Application of Accelerators in Research and Industry Proceedings of the Fifteenth International Conference

Denton, Texas, November 1998

Editors: J.L. Duggan and I.L. Morgan

Section I. Atomic and Molecular Physics

- ◆ Molecular Effects in K-Shell Ionization by Charged Particles L. H. Toburen
- ◆ Description of Ionization in Ion-Atom Collisions from Low to Intermediate Energies B. Pons
- ◆ An Application of the Classical Trajectory Monte Carlo Method to the study of Collisions between Highly Charged Ions and Surfaces J.A. Perez
- ◆ Recoil-Ion Momentum spectroscopy: Ionization in Ion-Atom Collisions S. F. C. O'Rourke
- ◆ A Generalized Description of Time-Dependent Ion-Atom Collisions B. Fricke
- ◆ M-Shell Ionization Cross Sections for 75-300 keV Protons on TM Using Thick and thin Targets K. Welsh
- ◆ Systematic Study of the L-Subshell Ionization Cross Sections of Ho, Er, and Tm by MeV α -Particle Bombardments B. A. Shehadeh
- ◆ Multiple Ionization in M-, N- and O-Shell in Collisions of O, Si and S Ions with Heavy Atoms M. Pajek
- ◆ M X-Ray Production in Yb, Hf, W, and Pb from Impact by 75-300 keV Protons S. J. Cipolla
- ◆ L-Shell Ionization Probabilities for Near-Central Collisions of MeV Protons with Low-Z Atoms M. Kavcic
- ◆ Collisional Deexcitation of Metastable Ions: A New Technique to Separate Radiative and Nonradiative Contributions H. T. Schmidt
- ◆ Techniques for Enhancing the Performance of High Charge State ECR Ion Sources Z. Q. Xie
- ◆ X-Ray and Auger Transitions from Highly-Ionized Ca Ions K. R. Karim
- ◆ Highly Charged Ion Trapping and Cooling L. Gruber
- ◆ Charge Exchange at Very Low Collision Energies I. Ben-Itzhak
- ◆ Charge State Fractions of Lead Ions formed in One-Electron Capture Collisions by Fast H⁺ and He²⁺ Ions P. C. E. McCartney
- ◆ Electron Capture from Hydrocarbon Molecules by Proton Projectiles in the 60-120 keV Energy Range J. M. Sanders
- ◆ Electron Capture and Ionization Cross Sections from Ion Collisions with Oriented Elliptic Rydberg Atoms K. R. Cornelius
- ◆ Absolute Electron Capture Cross Sections of Kr⁺ with Ar H. Martinez
- ◆ Enhanced Production of Nonequivalent Electron Configuration 3lnT' (n^o6) in Slow keV Ne¹⁰⁺ +He Collisions: Experiment and Theory J.-Y. Chesnel
- ◆ Calculation and Interpretation of Electron Momentum Densities S. B. Trickey
- ◆ Zero Degree Electron Emission in H⁺ Collisions with Gas Targets M. B. Shah
- ◆ Solid State Effects in Binary Encounter Electron Emission by Swift Heavy Ions (13.6-77 Me V/u) H. Rothard
- ◆ Double Electron Knockout to Study Electron Correlation J. H. Moore
- ◆ Investigation of Multi-Electron Processes in 60 keV O⁶⁺ +Ar Collisions Using a Triple Coincidence Technique H. Merabet
- ◆ Measurements of Photoelectron Angular Distributions Using a New Magnetic Angle-Changing Technique G. C. King
- ◆ Angular Correlation in Auger Photoelectron Coincidence Spectroscopy from the Cu(111) Surface R. Gotter
- ◆ Saturation Effects in Electron Loss G. M. Sigaud
- ◆ Flow of Ejected Electron Current in Ion-Atom Collisions E. Y. Sidky
- ◆ Three Body Effects in Low Energy (e,2e) Processes J. Rasch
- ◆ Experimental Studies of Electron Emission Produced by Fast, Grazing Ion-Surface Interactions S. B. Elston
- ◆ Electron-Impact Excitation of Multicharged Ions: Merged Beams Experiments M. E. Bannister
- ◆ Theoretical Studies of the Effects of Electron-Electron Correlation in the Photoionization of Small Molecular Systems R. R. Lucchese
- ◆ Electron Angular Distributions Measured with Simultaneous Analysis of Emerging Projectile Charge-State P. Focke
- ◆ Measurement of the Degree of Polarization for the Radiative Decay of He⁺ (np) (n=2 and 3) and He (1snp) 1P0 States Following Electron Impact on He R. Bruch
- ◆ Multiply Excited Ion Formation and Auger Stabilization S. Bliman
- ◆ Branching Ratios in Dissociative Recombination Measured in a Storage Ring L. Viktor
- ◆ Ionization and Fragmentation of H₂ and CH₄ and their Deuterated Variants by Photon Impact R. A. Mackie
- ◆ Differential Cross Section Measurements in Ion-Molecule Collisions S. Cheng
- ◆ Molecular Dynamics in Attosecond-Duration Intense-Field Pulses Using a Tandem Accelerator D. Mathur
- ◆ Dissociative Ionisation of Simple Molecules by Photons and Fast Ions K. F. Dunn
- ◆ Ion Storage Ring Measurements of Dielectronic Recombination for Astrophysically Relevant Feq⁺ Ions D. W. Savin
- ◆ Excitation and Ionization of Exotic and Non-Exotic Atoms in Heavy-Ion Collisions D. Trautmann

- ◆ Looking for Polarization Bremsstrahlung in the midst of Inner-Shell Ionization: Analysis of the X-Ray Spectrum in Electron Interactions with Thin-Film Targets C. A. Quarles
- ◆ The Emission of Charged Particles with eV Energies from Hot Graphite R. Sears
- ◆ A Fully Characterized Multilayer Mirror (MLM) Polarimeter in the EUV Range for Application in Atomic and Surface Collision Experiments M. Bailey
- ◆ Precision Atomic Spectroscopy with an Integrated Electro-Optic Modulator C. Koehler
- ◆ Photodetachment Cross Section: Use of a Saturation Technique in Laser-Ion Beam Interactions D. H. Lee

- ◆ Laser Induced Radiative Recombination with Polarized Photons E. Justiniano
- ◆ Reverse Energy-Pooling in a K-Na Mixture J. O. P. Pedersen
- ◆ Molecular Dissociation in Dilute Gas S. N. Renfrow
- ◆ Secondary Electron Emission from SnTe(001) and KCl(001) Surfaces Induced by Specularly Reflected Protons G. Andou
- ◆ Energy Loss of Heavy Ions in Solids at Energies Below 5 MeV/u A. Sharma
- ◆ Atomic Physics with the Scanning Tunneling Microscope M. Kleber

Section II. Nuclear Physics and Radioactive Ion Beam Facilities and Experiments

- ◆ Parity Violation in the Compound Nucleus G. E. Mitchell
- ◆ New Measurements of Spin-Dependent n-p Cross Sections B. W. Raichle
- ◆ An Algorithm for Computing Thick Target Differential p-Li Neutron Yields Near Threshold C. L. Lee
- ◆ Excitation of the 180Tm Isomer in (?,n) Reactions A. P. Tonchev
- ◆ Parity Violation in 2s-1d Nuclei Using the (p, ?) Reaction B. E. Crawford
- ◆ Monitoring of Alpha-Beam Properties by the nat Ti (?, x)51 Cr Reaction: New Measurements and Critical Compilation A. Hermanne
- ◆ Extraction of the 1So Neutron-Neutron Scattering Length from a Kinematically- Complete n-d Breakup Experiment at TUNL D. E. Gonzalez Trotter
- ◆ Measurement of the Parity Violating Asymmetry A_y in n+p-d+y W. S. Wilburn
- ◆ Neutron Capture Measurements on Unstable Nuclei at LANSCE J. L. Ullmann
- ◆ Studies of the D State of 6 Li Using the FSU Polarized 6Li Beam K. D. Veal
- ◆ A Dynamically Polarized Hydrogen and Deuterium Target at Jefferson Lab J. R. Boyce
- ◆ Electron Scattering with Polarized Beams at MIT-Bates Accelerator Center M. Farkhondeh
- ◆ Computational Design of High Efficiency Release Targets for Use at ISOL Facilities Y. Liu
- ◆ On-Line Collection of a Radioactive Target-A Poor Man's Radioactive Beam Collider U. Koster
- ◆ A Neutron Beam Facility for Radioactive Ion Beams and Other Applications L. B. Tecchio
- ◆ Approaches to Develop Targets for Production of Intense Radioactive Ion Beams W. L. Talbert
- ◆ The Production and Generation of Radioactive Ion Beams (RIBs) A. Schempp
- ◆ In-Beam Production and Transport of Radioactive 17F at ATLAS R. C. Pardo
- ◆ Recent Experimental and Technical Achievements at ISOLDE/CERN U. Georg
- ◆ The Production and Acceleration of Radioactive Ion Beams at the HRIBF R. L. Auble
- ◆ The Use of Lasers for the Selective Ionization of Radionuclei for RIB Generation V. N. Fedoseyev
- ◆ Sirius: A Proposal for an Accelerated Radioactive Beams Facility at ISIS P. V. Drumm
- ◆ High Efficiency Release Targets for Radioactive Ion Beams: A Different Approach M. Gaelens
- ◆ Status of the REX-ISOLDE Project O. Kester
- ◆ Silicon Strip Detectors for Radioactive Beam Experiments F. Marechal
- ◆ BEARS: A Radioactive Ion Beam Initiative at LBNL J. Powell
- ◆ A High Intensity Electron Beam Ion Trap for Charge State Boosting of Radioactive Ion Beams R. E. Marrs
- ◆ Nuclear Astrophysics with RIBs at Oak Ridge National Laboratory D. W. Bardayan
- ◆ The Physics of Sub-Critical Lattices in Accelerator-Driven Hybrid Systems: The Muse Experiments in the MASURCA Facility J. P. Chauvin
- ◆ Near Threshold (γ , 2e) Studies G. C. King
- ◆ Novel, Spherically-Convergent Ion Systems for Neutron Source and Fusion Energy Production D. C. Barnes

Section III. Positron Sources, Experiments and Theory

- ◆ Positron Annihilation in Opals: Evidence of Positronium Formation J. M. Urban
- ◆ The Japanese Positron Factory S. Okada
- ◆ Double Ionization of Noble Gases by Positron Impact H. Bluhme
- ◆ High Intensity Positron Program at LLNL P. Asoka-Kumar
- ◆ Bulk Defect Analysis with a High-Energy Positron Beam J. H. Hartley
- ◆ Concept of an Intense Positron Source at the New Superconducting LINAC "ELBE" G. Brauer

Section IV. Clusters, Fullerenes, Biomolecules

- ◆ Energy Deposition in Fullerene-Type Nano-Structures S. P. Apell
- ◆ Applications of Cluster Ion Implantation in Microelectronics Devices I. Yamada
- ◆ Ultra Low Energy Boron Implantation Using Cluster Ions for Decanometer MOSFETs T. Sugii
- ◆ Polyethylene Thin-Film Growth via Cluster-Surface Collisions T. A. Plaisted
- ◆ Collisions of Slow Protons with Neutral and Charged Closed-Shell Metal Clusters M. F. Politis
- ◆ Electronic Sputtering from an SiO₂ Target Bombarded by Heavy Ions N. Imanishi
- ◆ Molecular Dynamics Simulations of Organic SIMS with Cun (n=1-3) Clusters J. A. Townes
- ◆ Equipment for Processing by Gas Cluster Ion Beams A. Kirkpatrick
- ◆ Optical Thin Film Formation by Gas-Cluster Ion Beam Assisted Deposition H. Katsumata
- ◆ Mechanisms of Formation of Metal Cluster Nonlinear Optical Light Guide Structures in LiNbO₃ by Ion Beam Implantation E. K. Williams
- ◆ Nitride Thin Films Synthesis by Cluster Ion Beam H. Saito
- ◆ Surface Smoothing of CVD-Diamond Membrane for X-Ray Lithography by Gas Cluster Ion Beam A. Nishiyama
- ◆ Oxide Film Deposition by Gas-Cluster Ion Assisted Deposition K. Murai
- ◆ Novel Analysis Techniques Using Cluster Ion Beams J. Matsuo

Section V. PIXE, X-Rays, RBS, ERD, NRA, CPAA, Fragmentation, Desorption, Sputtering, Codes, and Handbooks

- ◆ Secondary Fluorescence in PIXE Channeling Measurements A. Seppala
- ◆ The Marginal Leakage of some Dental Cements in Humans: A PIXE-Microbeam Approach A. Zadro
- ◆ Elemental Analysis of Soluble and Insoluble Fractions of River-Waters by Particle-Induced X-Ray Emission H. Yamazaki
- ◆ IBA on Functional Polymers M. P. de Jong
- ◆ SRXRF Imaging of a Single Brain Cell from a Patient with Parkinson's Disease K. Takada

- ◆ A Comparison Between PIXE Studies and Electron Microprobe Studies of Rocks from Southern India G. F. Peaslee
- ◆ Proton Induced Monochromatic X-Rays: A Technique for Solving Interference Problems in X-Ray Fluorescence Analysis A. G. Karydas
- ◆ Application of Micro-PIXE Method to Ore Geology S. Murao
- ◆ PIXE Analysis of Low Concentration Aluminum in Brain Tissues of an Alzheimer's Disease Patient R. Ishihara
- ◆ The New Dedicated PIXE Set-Up at the National Environmental Research Institute, Denmark K. Kemp
- ◆ Stoichiometry of DyFeCo Magneto-Optical Alloys by Combined PIXE/RBS D. Strivay
- ◆ An Endurance Test of Kapton Foil in-Air PIXE System S. Matsuyama
- ◆ Irradiation Effects on Ti and SUS-304 Membranes Caused by the Transmission of High-Energy Proton Beam S. Yamaguchi
- ◆ Soft X-Ray Appearance Potential Study of Rare Earth-Manganese Compounds A. R. Chourasia
- ◆ Characterization of Thin Films by Means of Soft X-Ray Reflectivity Measurements J. Friedrich
- ◆ Upgrading RBS Analysis of Single Crystals by Application of Triple Correlation H. Ellmer
- ◆ Development of a Compact High-Resolution RBS System for Monolayer Analysis K. Kimura
- ◆ RBS/Simulated Annealing and FTIR Characterisation of BCN Films Deposited by Dual Cathode Magnetron Sputtering N. P. Barradas
- ◆ Rutherford Backscattering and Channeling Studies of Al and Mg Diffusion in Iron Oxide Thin Films S. Thevuthasan
- ◆ Time of Flight Elastic Recoil Detection for Thin Film Analysis M. S. Rabalais
- ◆ The Effects of Multiple and Plural Scattering on Heavy Ion Elastic Recoil Detection Analysis P. N. Johnston
- ◆ Study on Depth Profiles of Hydrogen in Boron-Doped Diamond Films by Elastic Recoil Detection Analysis C. Liao
- ◆ Use of Rutherford Forward Scattering for the Elemental Analysis of Evaporated Liquid Samples J. A. Liendo
- ◆ Exchange of Hydrogen Isotopes in Oxide Ceramics and Water-Vapor Using ERD Technique T. Hayashi
- ◆ Advantages of Nuclear Charge Dispersive (?E-E) Detection System in Hydrogen Profiling by ERDA M. El Bouanani
- ◆ Status of the Accelerator Facility at the Environmental Molecular Sciences Laboratory D. E. McCready
- ◆ SIMNRA, A Simulation Program for the Analysis of NRA, RBS and ERDA M. Mayer
- ◆ "Magic" Energies for Detecting Light Elements with Resonant Alpha Particle Backscattering
C. J. Wetteland
- ◆ Oxygen Depth Profiling by Nuclear Resonant Scattering G. T. Gibson
- ◆ A Nuclear Reaction Analysis Study of Fluorine Uptake in Flint J-Y. Jin
- ◆ The Recoil Implantation Technique Developed at the U-120 Cyclotron in Bucharest C. I. Muntele
- ◆ Fragmentation of Macromolecular Ions I. D. Williams
- ◆ Desorption Induced by Atomic and Molecular Ion Collisions on LiF J. A. M. Pereira
- ◆ Sputter-Initiated Resonance Ionization Spectroscopy at the University of North Texas A. W. Bigelow
- ◆ Trajectory Effects in Multiply Charged Ion-Surface Interactions H. Lebius
- ◆ A New IBA Handbook on ERDA Y. Serruys
- ◆ Influence of Planar Oscillations on Scattered Ion Energy Distributions in Transmission Ion Channeling A. A. Bailes, III
- ◆ Advanced Capabilities and Applications of a Sputter-RBS System B. Brijs
- ◆ Rapid Accurate Automated Analysis of Complex Ion Beam Analysis Data P. K. Marriott
- ◆ General Purpose Computational Tools for Simulation and Analysis of Medium-Energy Backscattering Spectra R. A. Weller
- ◆ Characterization of Thin Film CCD Filters on Board the German Astronomy Satellite ABRIXAS by Soft X-Ray Transmission Measurements K.-H. Stephan
- ◆ Robust Fitting of Spectra to Splines with Variable Knots R. L. Coldwell

Section VI. Synchrotron Storage Rings, X-Ray Tomography Facilities and Experiments

- ◆ SRXRF Elemental Imaging of a Single Neuron from Patients with Neurodegenerative Disorders S. Yoshida
- ◆ Heavy Element Sensitive Tomographies Using Synchrotron Radiation T. Materna
- ◆ Development of Hard X-Ray Exposure Tool for Micromachining at CAMD H. M. Manohara
- ◆ Advances in Site-Specific Dissociation of Molecules Using Synchrotron Radiation P. A. Hatherly

Section VII. Accelerator Mass Spectroscopy

- ◆ AMS of Solid Natural Materials J. C. Rucklidge
- ◆ Materials Analysis Using Trace Element Accelerator Mass Spectrometry (TEAMS) S. A. Datar
- ◆ Radionuclides in Man and His Environment Measured by Accelerator Mass Spectrometry R. Hellborg
- ◆ Sample Multi-Cathode Source of Negative Ions by Cesium Sputtering (134 MC-SNICS) R. L. Loger
- ◆ Status Report of the National Ocean Sciences AMS Facility at Woods Hole Oceanographic Institution: Operations and Recent Developments M. Bellino
- ◆ Microbeam AMS for Element and Isotopic Studies S. H. Sie
- ◆ Characteristics of the HVEE 3MV Multi-Element AMS System A. Gott dang
- ◆ The HVEE 14C Isotope Ratio Mass Spectrometer for Biomedical Applications D. J. W. Mous
- ◆ Results of Recent Tests of NEC AMS Systems M. L. Sundquist
- ◆ A New Small Accelerator for Radiocarbon Dating M. Suter
- ◆ A New Lab VIEW-Based Control System for the Naval Research Laboratory Trace Element Accelerator Mass Spectrometer T. M. De Turk

Section VIII. Neutron Techniques for Nondestructive Analysis, Neutron Sources, FNAA

- ◆ Nuclear Techniques for the Inspection of Blast Furnaces J. S. Schweitzer
- ◆ CAFNA©, Coded Aperture Imaging for Fast Neutron Analysis: Application to Contraband and Explosive Detection R. C. Lanza
- ◆ Vehicle and Cargo Container Inspection System for Drugs V. V. Verbinski
- ◆ Gamma-Ray Nuclear Resonance Absorption (?-NRA) for Explosives Detection in Air Cargo D. Vartsky
- ◆ Neutron-Based Portable Drug Probe P. C. Womble
- ◆ On-Line Analysis of Bulk Materials Using Pulsed Neutron Interrogation P. Lebrun
- ◆ Low Cost Mobile Explosive/Drug Detection Devices T. Gozani
- ◆ The First IEC Fusion Industrial Neutron Generator and Developments J. Sved
- ◆ Industrial Applications Using 14 MeV Neutrons at KFUPM A. Aksoy
- ◆ Small Accelerator-Based Pulsed Cold Neutron Sources R. C. Lanza
- ◆ Neutron Focusing Using Capillary Optics and its Applications to Elemental Analysis H. H. Chen-Mayer

- ◆ The Spallation Neutron Source (SNS) Project Accelerator Systems J. A. Holmes
- ◆ Image Reconstruction from Pulsed Fast Neutron Analysis J. Bendahan
- ◆ Fast Neutron Activation Analysis of Oxide Inclusions in Magnesium Alloy Ingots C. D. Fuerst

Section IX. Ion Implantation: Materials Modification, Semiconductors, Facilities, Codes

- ◆ Laser Nitriding Ion Beam Analysis P. Schaaf
- ◆ New Optical Properties of MgO after MeV Metal Ion Implantation R. L. Zimmerman
- ◆ The Behaviour of Hydrogen in Titanium after Ion Implantation M. Soltani-Farshi
- ◆ Silver Nanocluster Formation in Implanted Transparent Materials F. L. Freire, Jr.
- ◆ MeV Ion Beam Interaction with Polymer Films Containing Cross-Linking Agents A. L. Evelyn
- ◆ Surface Modification by Molecular Ions L. Hanley
- ◆ Ion Beam Mixing of Fe with Sapphire and Silica S. K. Sinha
- ◆ Quantum Models for Dechanneling by Point Defects and Extended Defects A. P. Pathak
- ◆ Ion-Induced Compositional Changes at ZrO₂ Surfaces under Ar⁺ and He⁺ Ion-Bombardment V. A. Miteva
- ◆ The Prospects for Low Energy Implantation with Large Molecular Ions--The Case of Decaborane M. Sosnowski
- ◆ Ion Implantation Requirements for Deep Submicron Technology A. Jain
- ◆ Defects and Diffusion in MeV Implanted Silicon V. C. Venezia
- ◆ Large Area Ion Implantation at Low Energies H. Rysse
- ◆ Ion Beam Mixing of Metal/Fluoropolymer Interfaces D. L. Dennis
- ◆ Behavior of Binary Metal Adsorbates on Si(111) Surface Under Thermal Annealing and Ion Bombardment Using RBS K. Morita
- ◆ Effect of Ion Beam Mixing on Interface Electrical Resistivity of Metal-Silicide Thin Film W. Kishimoto
- ◆ Solutions to Defect-Related Problems in Implanted Silicon by Controlled Injection of Vacancies by High-Energy Ion Irradiation E. G. Roth
- ◆ Ion Induced Electron Emission from Si and Photoresist Surfaces Z. Y. Zhao
- ◆ Implantation Induced Changes in II-VI Semiconductor Heterostructures G. Bacher
- ◆ Process Advances to Achieve Ultra-Shallow Junctions for 0.10 μm Technology Requirements A. F. Bertuch
- ◆ PARMELA Simulations of RF Linear Accelerators for Ion Implantation D. R. Swenson
- ◆ High Current Metal Ion Implantation to Synthesize some Conducting Metal-Silicides B. X. Liu
- ◆ The Control of Uniformity in Parallel Ribbon Ion Beams up to 24 Inches in Size N. R. White
- ◆ Correlation of Experimental Damage Data for the Development of the UT-MARLOWE Monte Carlo Ion Implant Simulator M. F. Morris

Section X. Detectors and Spectrometers

- ◆ Low Intensity Beam Imaging--Position Sensitive Avalanche Counter T. A. Lewis
- ◆ Nuclear Recoil Detection with Microchannel Plates J. Mosher
- ◆ A New Compact Eucentric Goniometer for RBS, HFS, PIXE, and Channeling M. D. Strathman
- ◆ Radiation Detection with Noble Gases: Modeling and Measurements T. H. V. T. Dias
- ◆ A study of Silicon Escape Peaks for X-Ray Detectors with Various Crystal Dimensions A. G. Karydas
- ◆ Particle Detectors for Low Intensity Ion Beam Diagnostics P. Finocchiaro
- ◆ Amorphous Silicon Thin Film X-Ray Sensor G.-P. Wei

Section XI. Accelerator Technology, Facilities, New Accelerators, Injectors, Ion Sources, Beam Monitors, Power Supplies, Targets, Codes

- ◆ Applications of High-Energy Heavy-Ions from Superconducting Cyclotrons T. L. Grimm
- ◆ A High-Brightness, Electron-Based Source of Polarized Photons and Neutrons J. E. Spencer
- ◆ Electron-Ion Collision Studies Using a 14.0 GHz ECRIS A. Chutjian
- ◆ Semi-Empirical Ionization and Excitation Rate Coefficients for Hydrogen, Helium, and Oxygen Atoms and Ions in Plasmas Y. Chang
- ◆ Ion Cooling and Accumulation J. Bosser
- ◆ A Three-Dimensional Beam Profile Monitor Based on Residual Gas Ionization D. Shapira
- ◆ Solid State Power Systems for DC and RF Accelerators R. J. Adler
- ◆ The Upgrade of PKUAMS Control System X. Lu
- ◆ A New High Power Adjustable RF Coupling Loop B. Amini
- ◆ RF Deflector System for Beamlines J. Heikkinen
- ◆ Linac Drift Tube Tank Upgrade Engineering---Cooling Solution G. Li
- ◆ Photoconductive Switch Enhancements for Use in Blumlein Pulse Generators F. Davanloo
- ◆ Self-Renewing Magnetized Plasma Targets. Principles and Applications V. Nardi
- ◆ A Rotating Target Wheel System for Gammasphere J. P. Greene
- ◆ The Plasma Porthole: A Windowless Vacuum-Pressure Interface with Various Accelerator Applications W. Gerber
- ◆ New Solid and Gas Phase Targets for the CTI RDS 111 Cyclotron J. P. O'Neil
- ◆ MAPA: An Interactive Accelerator Design Code with GUI D. L. Bruhwiler

Section XII. Radiation Processing, Electron Accelerators, Techniques

- ◆ Cyclotron Autoresonant Accelerator for Electron Beam Dry Scrubbing of Flue Gases M. A. LaPointe
- ◆ Electron Accelerators for Industrial Processing---A Review W. Sharf
- ◆ A Rhodotron Electron Beam Facility for Pre-Treatment of Cellulosic Pulp M. R. Cleland

Section XIII. Medical Applications: Proton and Neutron Isotope Production, PET, New Facilities, BNCT, Beam Line Modeling

- ◆ World Wide Proton Therapy Experience in 1997 J. M. Sisterson
- ◆ The Non-Orthogonal Fixed Beam Arrangement for the Second Proton Therapy Facility at the National Accelerator Centre A. N. Schreuder
- ◆ Routine Operation of the University of Washington Fast Neutron Therapy Facility and Plans for Improvements R. Risler
- ◆ Recent Performance of the NPTC Equipment Compared with the Clinical Specifications J. B. Flanz
- ◆ Requirements for the Loma Linda Proton Therapy Accelerator G. Coutrakon
- ◆ Improvements for the Iodine-123 Production at the JYFL-Accelerator A. Virtanen
- ◆ DOPASCAN® Injection ([¹²³I]-CIT): A Radiopharmaceutical with Potential for the Diagnosis of Parkinson's Disease D. P. Nowotnik

- ◆ Production and Quality Assurance of Cyclotron Produced Iodine-124 from Enriched Tellurium Targets J. Balatoni
- ◆ Excitation Functions of Deuteron Induced Nuclear Reaction on natMo and 100Mo(90%) up to 50 MeV: An Alternative Route for the Production of 99Mo M. Sonck
- ◆ Low Energy Cyclotron Production and Separation of Yttrium-86 for Evaluation of Monoclonal Antibody Pharmacokinetics and Dosimetry R. D. Finn
- ◆ Accelerator Production of 122Xe (20.1 h) as a Source of 122I (3.6 m) Labeled Radiopharmaceuticals for Applications in Positron Emission Tomography M. C. Lagunas-Solar
- ◆ A Continuous [15O]H2O Production and Infusion System for PET Imaging M. Sajjad
- ◆ A High Power High Yield Target for Production of Bio-Isotopes for PET B. Amini
- ◆ Production of 17F, 15O and Other Radioisotopes for PET using a 3 MV Electrostatic Tandem Accelerator A. D. Roberts
- ◆ Production of PET Radionuclides Using a 10.5 MeV 3He RFQ Accelerator J. M. Link
- ◆ Intelligent [F-18] Fluoride Target System R. D. Hichwa
- ◆ An Apparatus for the Preparation of [15O]-H2O for Rapid Repetitive PET Studies J. R. Dahl
- ◆ Solid Targetry for Radionuclide Production at the University at Buffalo E. Bars
- ◆ Planning a New Life for the IUCF Cyclotrons J. M. Cameron
- ◆ Conceptual Design Study on an Accelerator Based BNCT Facility H. Yokobori
- ◆ Experimental and Theoretical Evaluation of Accelerator Based Epithermal Neutron Yields for BNCT L. Wielopolski
- ◆ Compact, Inexpensive, Epithermal Neutron Source for BNCT D. A. Swenson
- ◆ Temperature Rise in Lithium Targets for Accelerator Based BNCT Using Multi-Fin Heat Removal C. L. Lee
- ◆ Exploring Alternative (p,n) and (d,n) Reactions for BNCT N. Colonna
- ◆ Initial Experimental Verification of the Neutron Beam Modeling for the LBNL BNCT Facility D. L. Bleuel
- ◆ Experimental Dosimetry and Beam Evaluation in a Phantom for Near Lithium Threshold Accelerator Based BNCT R. J. Kudchadker
- ◆ Requirements for Manufacturer Supplied Data for Monte Carlo Simulation: A BEAM Perspective R. A. C. Siochi
- ◆ Surface Treatment of Glassy Polymeric Carbon Artifacts for Medical Applications M. G. Rodrigues

Section XIV. Radiography

- ◆ Neutron Fan Beam Source for Neutron Radiography Purpose P. Le Tourneur
- ◆ The Relationship between Contrast, Resolution and Detectability in Accelerator-Based Fast Neutron Radiography R. M. Ambrosi
- ◆ Accelerator-Based Neutron Radioscopic Systems H. Berger
- ◆ CastScan: High Energy Tomography for Continuous Casting of Metals J-H. Chun

Section XV. Teaching, Training

- ◆ Experiments at the Triangle Universities Nuclear Laboratory for the Undergraduate Physics Curriculum C. R. Howell
- ◆ Modern Physics Lab Experiments Using Crystal X-Ray Generators S. M. Shafroth
- ◆ Computer-Based Training for Particle Accelerator Personnel R. R. Silbar
- ◆ The Restructured "Advanced Laboratory" at Hope College---A Step Toward Independence C. M. Mader
- ◆ "Accelerators and Beams," Multimedia Computer-Based Training in Accelerator Physics R. R. Silbar

Section XVI. IBIC

- ◆ Ion Beam Induced Charge Collection (IBICC) from Integrated Circuit Test Structures Using a 10 MeV Carbon Microbeam B. N. Guo
- ◆ Lateral IBIC by Single Proton Counting on Diffusion/Depletion Regions: Theory and Experiment C. Manfredotti

Section XVII. Safety

- ◆ Environmental and Safety Issues Associated with a 30-GeV Proton Synchrotron E. T. Lessard
- ◆ The Decommissioning of Accelerators: An Exercise in the Recycling of Radioactive Material M. Hofert
- ◆ Estimated Leakage Radiation from Inshas Cyclotron M. N. H. Comsan
- ◆ HRIBF Tandem Accelerator Radiation Safety System Upgrade R. C. Juras
- ◆ A Galilean Invariant Theory of Atomic Collisions: Spectra of Ejected Electrons S. Y. Ovchinnikov

ISBN13: 9781563968259

Pub. Date: 6/1/1999

Publisher(s): Springer Verlag
